ASSIGNMENT 7:
EJS: Todo list project (Module 14)

Problem Statement: This project involves creating a dynamic Todo List web application using EJS (Embedded JavaScript). The application will allow users to add, edit, and delete tasks seamlessly. It will feature an intuitive user interface that updates in real-time, ensuring efficient task management and a streamlined user experience. This project seeks to enhance productivity by offering a user-friendly interface for organizing and managing tasks efficiently.

Submission: You need to upload the **compressed zip file of your working project folder** to drive and then submit the accessible link (**make sure to enable sharing access**).

Reference: For reference, as mentioned above please follow **MERN Stack course >Module 14**
