# ASSIGNMENT 8:

## Putting it all together: Todo List Web Project with MongoDB Integration (Module 17)

**Problem Statement:** This project involves developing a Todo List web application using EJS (Embedded JavaScript) and MongoDB. The application will allow users to manage tasks by creating, editing, and deleting them, with all task data stored permanently in a MongoDB database. The user interface will dynamically update using EJS templates, ensuring seamless interaction and persistent storage of tasks for efficient task management over time.

**Submission:** You need to upload the **compressed zip file of your working project folder** to drive and then submit the accessible link (**make sure to enable sharing access**).

**Reference:** For reference, as mentioned above please follow **MERN Stack course >Module 17, and also module 15,16!**
