ASSIGNMENT 9:
Authentication and security: Secrets -Web Project (Module 19)

Problem Statement: This project aims to demonstrate robust authentication and security features for a web application called "Secrets." The application will include functionalities such as user registration, login/logout mechanisms, and secure session management using cookies. It will implement encryption techniques to safeguard sensitive user data, ensuring confidentiality and integrity throughout user interactions. The goal is to showcase best practices in web security, providing a safe and reliable platform for users to share and manage their secrets with confidence.

Submission: You need to upload the **compressed zip file of your working project folder** to drive and then submit the accessible link (**make sure to enable sharing access**).

Reference: For reference, as mentioned above please follow **MERN Stack course >Module 19**
